📍 London, United Kingdom

SUMMARY

Graduated as a Full-Stack developer from the Le Wagon Bootcamp | Expert in back-end and UX/UI design with strong skills in JavaScript, React.js, Stimulus JS, Ruby on Rails, HTML, Node, Python, Typescript, CSS and SQL | Led web development projects alongside teams of like-minded developers | Founder of a tech start-up | Quick learner eager to master new coding languages.

EXPERIENCE

Software Engineer - Intern

Change The Block

📅 10/2023 - Present 📍 London, UK

Change The Block is a company specialized in offering software, apps and websites solutions for companies in any industry, with a special focus on blockchain.

- Worked alongside teams of like-minded developers to build robust and complex websites in order to meet clients' needs.
- Worked with Typescript, Node, Javascript, Python and React to develop the necessary back-end functionalities across different projects in order to deliver fully functioning websites to our clients.
- Worked deeply with database creation using MongoDB procedures in order to structure the content of the different websites, integrating it within our Typescript projects.
- Enhanced team-work skills through the use of platforms such as Github and Gather.

Full Stack Web Developer - Lead Developer

Docsight

📅 2023 📍 London, UK

Docsight is a platform where users can find a doctor according to their needed specialty and location in just a few clicks. I worked on this project as a lead full-stack developer, and I was responsible for building, deploying and maintaining the application at all stages.

- Managed a team of doctors and developers to create an app that maximizes customer satisfaction and provides opportunities to doctors and patients to meet their particular needs.
- Worked with Ruby on Rails to develop automated solutions through the creation of complex database architecture using SQL procedures, and created all the back-end functionalities needed to improve the user journey.
- Created a professional UI using HTML, CSS, JavaScript and Stimulus JS.
- Developed strong skills in team-work through the use of platforms such as GitHub and Figma.

EXPERIENCE

Metacrew - Founder | CEO

📅 04/2021 - 03/2023 📍 London, UK

Metacrew is a start-up in the Web 3.0 industry whose aim is to create a set of different projects (metaverse, events with influencers, play-to-earn video game) in order to raise the value of our token.

- Managed a team of twelve people, including web developers, graphic designers, social media managers and tokenomics experts.
- Managed and created a website that integrated blockchain technology through the use of Solidity and React.
- Managed the creation of mathematical functions to ensure the success of our ERC-20 token.
- Built strategic partnerships with companies and influencers to enhance the quality of our product.
- Created a professional pitch deck and white paper to pitch investors alongside a team of graphic designers.
